

HEALTH SERVICES

The State of New Jersey requires that all students meet certain health requirements in order to attend school:

- Written documentation from a medical provider showing proof of receiving a series of immunizations. The school nurse will inform you which immunizations are required.
- All preschool students, under the age of 5, are to provide written proof of receiving a flu vaccine by December 31st annually.
- A physical examination, completed by the student's medical provider within 30 days of enrollment into our district.

According to the State Law we are not permitted to have your child attend school unless the above are fulfilled.
